The 75th Street Corridor Improvement Project (75th St. CIP) is CREATE’s largest and most significant project. The 75th St. CIP will deliver transportation, economic and environmental benefits in the Chicago neighborhoods of West Englewood, Englewood, Greater Grand Crossing, Chatham, Roseland, Washington Heights, Auburn Gresham, Ashburn and Chicago Lawn in addition to the project’s regional and national benefits.

As final design begins on the 75th St. CIP, the CREATE partners invite you to attend a public open house to learn more about the project’s:

- status
- design and construction timelines
- local mobility improvements
- educational opportunities for youth
- job training and contracting opportunities
- property impacts and acquisitions

The CREATE Program

CREATE is a partnership between the U.S. Department of Transportation, State of Illinois, Cook County, City of Chicago, Metra, Amtrak and the nation’s freight railroads. CREATE will invest billions in critically needed infrastructure improvements to improve transportation flow throughout Chicago. This is accomplished by increasing capacity, speed and reliability for freight and passenger train traffic; separating freight and passenger trains at 6 key junctions; and eliminating 25 road/rail grade separations.
